## Jasper County Public Transportation Survey

**Beaumont, Texas** - The South East Texas Regional Planning Commission (SETRPC) is conducting a Jasper County Public Transportation Survey to evaluate the demand for transit services within the county. This survey aims to gather insights on the community's transportation needs and determine the potential necessity and scope of public transit options in Jasper County.

The survey seeks to answer the following questions:

- Who needs to make trips?
- What is the purpose of their trips?
- Where do they live, and where do they need to go?
- What times do they need service?
- How much would they be able to pay for trips?

To ensure a comprehensive assessment, the South East Texas Regional Planning Commission (SETRPC) is actively seeking community feedback on how the public would utilize potential public transportation services. Jasper County residents are encouraged to take a few minutes to complete a brief survey that will help us better understand the specific transit service demands within the county. All individual survey responses will be kept confidential. Your input is vital in shaping the future of public transportation in Jasper County.
